INTRINSICALLY SAFE TANK ALARM HOSE FOR THE RENTAL INDUSTRY

Gizmo Engineering Intrinsically Safe Tank Alarm IS T Series level alarms Model IS-T-SS is a rugged tank level alarm that can be installed in minutes with no wiring. Just connect it to the battery. This model features all stainless-steel construction.

When liquid level changes the float position, a 102dB buzzer sounds and LED flashes. Pressing the button silences the buzzer while LED continues to flash. After 30 minutes, the buzzer sounds again if the level condition not corrected (in the default operating mode; other modes are field-selectable).
